

Biochemistry Manufacturing Lead (f/m/d)

Setting

At midge, we're reimagining the way healthcare systems work. You'll have the chance to be part of that change within a diverse and fast-growing team. We are creating the exciting opportunity for you to leave your footprint.

midge medical is developing diagnostic devices based on blood and other body fluids that are so easy to operate that they can be used by consumers as well as by health care professionals. The complete digitization of the testing procedure is at the core of our vision. We believe testing should be available, accessible and affordable to all. With our aim for ubiquitous testing, we will create a healthier world, reduce infections and take the pressure off public medical resources. You can contribute to our team as Biochemistry Manufacturing Lead and be at the center of all biochemistry manufacturing activities.

As Biochemistry Manufacturing Lead, you will

- Develop biochemical processes for protein and enzyme manufacturing
- Define and specify required processes (SOP) for manufacturing and purifying of biochemistry substances
- Identify manufacturers of required substances, machines or facilities
- Prepare make-or-buy decisions to meet the requirements of the company
- Build up and run our biochemistry manufacturing including processes, facility and the team
- Define and implement activity measurements to ensure proper biochemistry functions
- Develop lyophilization processes to optimize shelf live time of our products
- Develop the deliverables for our products and take series production requirements into account
- Collaborate closely with our hardware and biochemistry development team as well as our quality management team

You will be a fit for this role if you:

- Have experience in setting up and scaling manufacturing for biochemistry products
- Have a deep insight in the biochemistry or appropriate machine supplier world
- Expertise in freeze drying of pharmaceutical substances would be beneficial
- Have first experience in building up and leading a team
- Like the combination of start-up spirit and fast scaling combined with high quality standards of the medical devices industry
- Like taking on challenges and create results
- Are a good communicator

Qualification

- Master or PhD in Biochemistry or similar
- 5 years+ experience biochemical process optimization

- Preferably freeze drying (lyophilization) experience
- Knowledge of packaging and sealing of biochemical products
- German and English language skills (C1 or higher)

Place of Work

Berlin, Germany

Working Time

Part time or full time possible

When can you start?

As soon as we have agreed that we are a match!
