

UX/UI Designer (m/f/d)

At midge medical, we're reimagining the way healthcare systems work. You'll have the chance to be part of that change within a diverse and fast-growing team. We are creating the exciting opportunity for you to leave your footprint.

midge medical is developing diagnostic devices based on blood and other body fluids that are so easy to operate that they can be used by consumers as well as by professionals. The complete digitization of the testing procedure is at the core of our vision.

You can contribute to our team as UX/UI designer and be at the center of all UX design activities.

As a UX/UI Designer, you will

- create easy-to-use, on brand product designs
- do rapid prototyping to feed product ideas
- present your ideas to stakeholders and back-up your design decisions with profound knowledge and insights
- conduct user testing to validate your ideas, test design solutions and iterate on them to make them the best market fit
- - together with your colleagues - act as our customer evangelist and share your learnings and customer insights within your team and across the whole company
- continuously develop and enhance our styleguide, create new brand elements, illustrations, animations and icons
- define and push design principles and values that will guide the look and feel of our products
- be working in a cross-functional team together with senior product managers, researchers, hardware and software engineers to find the best solutions for our target group
- apply state-of-the art design methods and also engage and excite others for tools like design sprints or design studios

Must-Have Assets are

- you have an academic background in interaction / interface design or related field
- 3+ years of digital product design experience within the B2C or B2B sector, responsive web and app design
- 2+ years of experience working in cross-functional teams
- deep understanding of user-centered design approach
- experience with the entire product design cycle, from research to rapid prototyping, creation of mockups and prototypes, through to testing and the final design
- good understanding of web technologies such as HTML5 and Javascript
- You are an effective communicator and persuasively convey design solutions
- You are fluent in German (C1) and English

Preferred

- Knowledge of Adobe After-effects and the Lottie animation framework
- Experience and interest also in industrial design
- Experience in the the medical area is a plus

Work scope
